“PROMETHEUS” - VINO BIANCO

Grape variety: the best-known native white in the area

Vinification and refinement: contact directly for further information

Average life of the wine: Good multifaceted wine immediately but which certainly hides great surprises after even a medium-long refinement.

Serving temperature: 15-18° C

Color: between golden yellow and orange yellow

Bouquet: intense and mineral, inviting, with hints of candied fruit, lime honey and flowers.

Taste: intense, with a light acidic streak that gives freshness and persistence. Infinite wine in the mouth with marked sensations of fruit and delicate tannins that give this wine balance and cleanliness.

Pairings: the perfect pairing is certainly the one with blue cheeses and fatty fish, such as salmon and tuna. It does not disdain "feathered" game such as duck, pigeon and quail. Also excellent as a meditation wine, to be sipped pleasantly after dinner.
